Country allocations shown reflect the country of risk of the securities in the portfolio as assigned by Morningstar, though GQG's portfolios are constructed based on GQG's assessment of each issuer's country of risk exposure, which may not be the same as Morningstar's country assignment. GQG assesses the country's economic fortunes and risks to which it believes the issuer's assets, operations and revenues are most exposed by considering such factors as the issuer's country of incorporation, actual physical location of its operations, the primary exchange on which its securities are traded and the country in which the greatest percentage of its revenue is generated.
